

Bhuvansai Chilamkurthi

chbhuvansai522@gmail.com — +91 77803 18065 — [LinkedIn](#) — [GitHub](#) — Hyderabad, India

Objective

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning (AI & ML), with expertise in Python, NLP, and full-stack web development. Skilled in building innovative, data-driven solutions to real-world problems. Seeking opportunities to contribute to cutting-edge projects by leveraging proficiency in AI, ML, and software development to deliver impactful, intelligent solutions.

Education

B.Tech, Computer Science and Engineering

2022 – 2026

Malla Reddy University, Hyderabad

CGPA: 8.99/10.0 (Current)

Technical Skills

- **Programming Languages:** Python, Java
- **Web Development:** React.js, Node.js, FastAPI
- **Databases:** MongoDB, MySQL
- **Data Science & ML:** Pandas, NumPy, scikit-learn, NLTK, spaCy, Transformers
- **Tools:** Git, GitHub, VS Code, Google Colab, Tableau

Professional Skills

- Team Collaboration
- Problem Solving
- Adaptability

Key Projects

Automatic Grammar Checker

[GitHub](#)

- Developed an NLP-based grammar correction system using Gramformer and FLAN-T5 Transformer, achieving 92% accuracy in error detection and correction.
- Built a full-stack web application with FastAPI backend and React.js frontend, enabling real-time document error highlighting and correction.
- Demonstrated expertise in NLP, web development, and API integration, streamlining document editing for 100+ beta users.

Linguista: Your Ultimate NLP Bot

[GitHub](#)

- Designed an interactive educational platform for students to learn NLP concepts using NLTK and spaCy.
- Integrated real-time NLP operations (e.g., tokenization, sentiment analysis) with Chart.js visualizations, enhancing user engagement by 30%.
- Built a responsive React.js interface with Node.js backend, deployed for 50+ student users to explore NLP interactively.

Traffic Sign Board Detection

[GitHub](#)

- Developed a Python-based computer vision application using OpenCV and a CNN classifier trained on the GTSRB dataset (43 classes), achieving 95% classification accuracy.
- Applied data augmentation and hyperparameter tuning to improve model robustness, reducing false positives by 15%.
- Created a Tkinter-based desktop GUI for image uploads and real-time sign detection, used by 20+ local testers.

Certifications

- Google Cloud Computing – Google Developer Student Club (Oct 2024)
- Python for Everybody – Coursera (May 2024)
- Programming in Java – NPTEL (Sep 2024)
- Deloitte Australia Data Analytics Job Simulation – Forage (May 2025)

Achievements

- Secured Second Prize in National Hackathon by Malla Reddy University on Generative AI (2024), developing a pair programming chatbot with 85% user satisfaction in beta testing.
- National Semi-Finalist in Tata Imagination Challenge 2024 by Tata Group, advancing through top 3 rounds among 10,000+ participants.

Interests

- Actively follow advancements in AI and ML technologies.
- Enjoy traveling and nature photography.
